News from the Fire Department

Daylight savings time is here and before we know it that white stuff will again be falling. Please remember to change your batteries in your smoke detectors and carbon monoxide detectors.

We recently celebrated Fire Prevention Week and again enjoyed spending time and teaching the children, at both the elementary school and St. John – St. James, about fire safety.

Thank you to all that attended our recent annual pork chop dinner. It was another success, due to the continued support by all.

We have added two new members, Justin Schuh and Craig Anhalt, to the department. Welcome aboard Justin and Craig. They take the place of Scott Dvorachek and Andy Hoeffler. Thank you Scott for 7 years of service and Andy for 5 years of service. We wish you luck in your future plans.

So far this year the Fire Department has had 21 calls. If you have any questions regarding the fire department, do not hesitate to call or email me.

I have great attention to detail and I am willing to do any kind of cleaning. Whether it is just dusting and vacuuming or washing walls and shampooing carpets. Please call Jessica at 920-901-1066.

ARE THE CHEMICALS IN YOUR HOME MAKING YOU SICK?

Many of the cleaning agents you use daily are harmful, highly toxic and can cause allergic reactions, skin irritations, respiratory problems, suppress the nervous system and disrupt the ecosystem!

Our solution? Nature's Sunshine Products has introduced a new line of household products called Nature's Fresh. These products are plant-based, biodegradable, chemical-free, dioxane-free, phosphate-free, ph neutral (non-corrosive and non-caustic) and effective (anionic surfactants). The line includes laundry soap, non-chlorine bleach, dryer sheets, dish soap, dishwasher gel, citrus surface cleaner, and Silver Shield surface wipes.

For more information on the ingredients in other household products and their toxic contents, call me for a free newsletter.

In November, Nature's Sunshine is offering specials for in-home parties. If you would like to host a Clean and Green party in November you can contact me at:

Hello from the Reedsville Police Department

I would like to say thank you to everyone who has been so helpful during the past year. I officially started as your police chief November 15, 2009. During the past year I have truly enjoyed meeting many of the residents, spending time in our local schools and attending many functions. I want to thank you for the very warm welcome you have given me and look forward to building more community partnerships between the police department and the citizens we serve in the coming year.

Football, falling leaves, Halloween and Thanksgiving are all signs fall has arrived. It is amazing how fast the temperatures are dropping and along with dropping temperatures comes the preparation for winter and a reminder about winter parking and Sump pumps.

Standing up to Osteoporosis

In recent years more attention has been paid to osteoporosis and for good reason. This disease is a serious health problem resulting in more than 1.5 million fractures of the back, wrists and hips annually.

Bone loss usually occurs over time, without any symptoms. The amount of bone mass you have accumulated as a young adult and the rate at which you lose it as you age determine your risk for developing osteoporosis. The disease is more common in:

- women, especially those past menopause;
- women who go through menopause early (before 45);
- people with a thin or small frame;
- anyone with a history of low-trauma fractures as an adult;
- people with an inflammatory form of arthritis;
- those with a family history of osteoporosis;
- people who eat few calcium-rich foods, such as dairy foods;
- smokers and those who drink more than one or two alcoholic beverages a day;
- those of European and Asian ancestry;
- people who don't exercise regularly; and
- men with low levels of testosterone.

If you are at risk for developing this disease, ask your health care provider if you need a bone density test. This test is a fast, safe, and painless way to find out the status of a person's bone structure. Also, all women, age 65 and older and men 75 and older should get this test done regardless of risk factors.

It's important to diagnose osteoporosis as early as possible, so that treatment can begin immediately.
