

Water Conservation Notice

Reedsville

On Wednesday, October 20th Reedsville Waterworks will begin conducting the final part of routine maintenance work on the Village's only operational well. We expect the work to be completed by Saturday, October 23rd. During this time, the well cannot pump and the only available source of water for bathing and firefighting will be the water stored in the tower and the small reservoir on the south end of the Village. We are asking for your help to conserve water while we complete this work in order to minimize water pressure disruptions and maintain a supply of water for fighting fires.

What's the problem?

While we are implementing a variety of safeguards to prevent a loss of pressure in our water system while we conduct this work, we are asking you to minimize your water use during Wednesday, October 20th through Saturday, October 23rd in case we encounter unforeseen problems.

What can I do or not do?

Shorten shower times for the next few days, delay dish washing entirely until Saturday, October 23rd, complete all laundry by Wednesday, October 20th and postpone new laundry cycles until our work is completed, which is anticipated to be Saturday, October 23rd. Do not wash cars, boats, trailers, driveways, or sidewalks. Do not water lawns and if you have an automatic sprinkler system, please change the settings from auto to off.

When will this be over?

If the conservation advisory can end before Saturday, there will be a notice posted. Otherwise, plan to resume normal water usage on Saturday. We will notify you by posting updated information on the village website at www.Reedsville.org or on the bulletin board outside of the village hall front entrance.

Who can I call?

If you have questions regarding this work or the safety of our drinking water, please contact:

Dustin Kasbaum
920-754-4094

Thank you in advance for your cooperation!
It is greatly appreciated!
